

AVerMedia HD HomeFree Duet

HomeFree Duet is a LAN network TV Tuner device that allows users to watch real-time digital TV programs on iPad/laptop/desktop via home network. Its twin digital tuner design can serve two users to watch different TV channels on their own devices at the same time.

HomeFree Brings Live TV to iPad

- 1.HomeFree Duet supports streaming digital TV to two iPads simultaneously over a Wi-Fi router
- 2.SD video quality on iPad is in Mpeg-2 format
- 3.HomeFree Player is the viewing software on iPad and available for users to download on Apple App Store since the middle of Dec. 2010.
- 4.HomeFree Player supports:
 - Intuitive interface: change channels by tapping or dragging on the iPad screen
 - EPG: Full channel and TV program information with Electronic Program Guide
 - Sociability: users can capture screenshot of TV being watched and share screenshots with friends on social networking sites.
 - e-Shop list: allow users to purchase a HomeFree Duet online instantly if they have installed HomeFree Player on their iPads already.

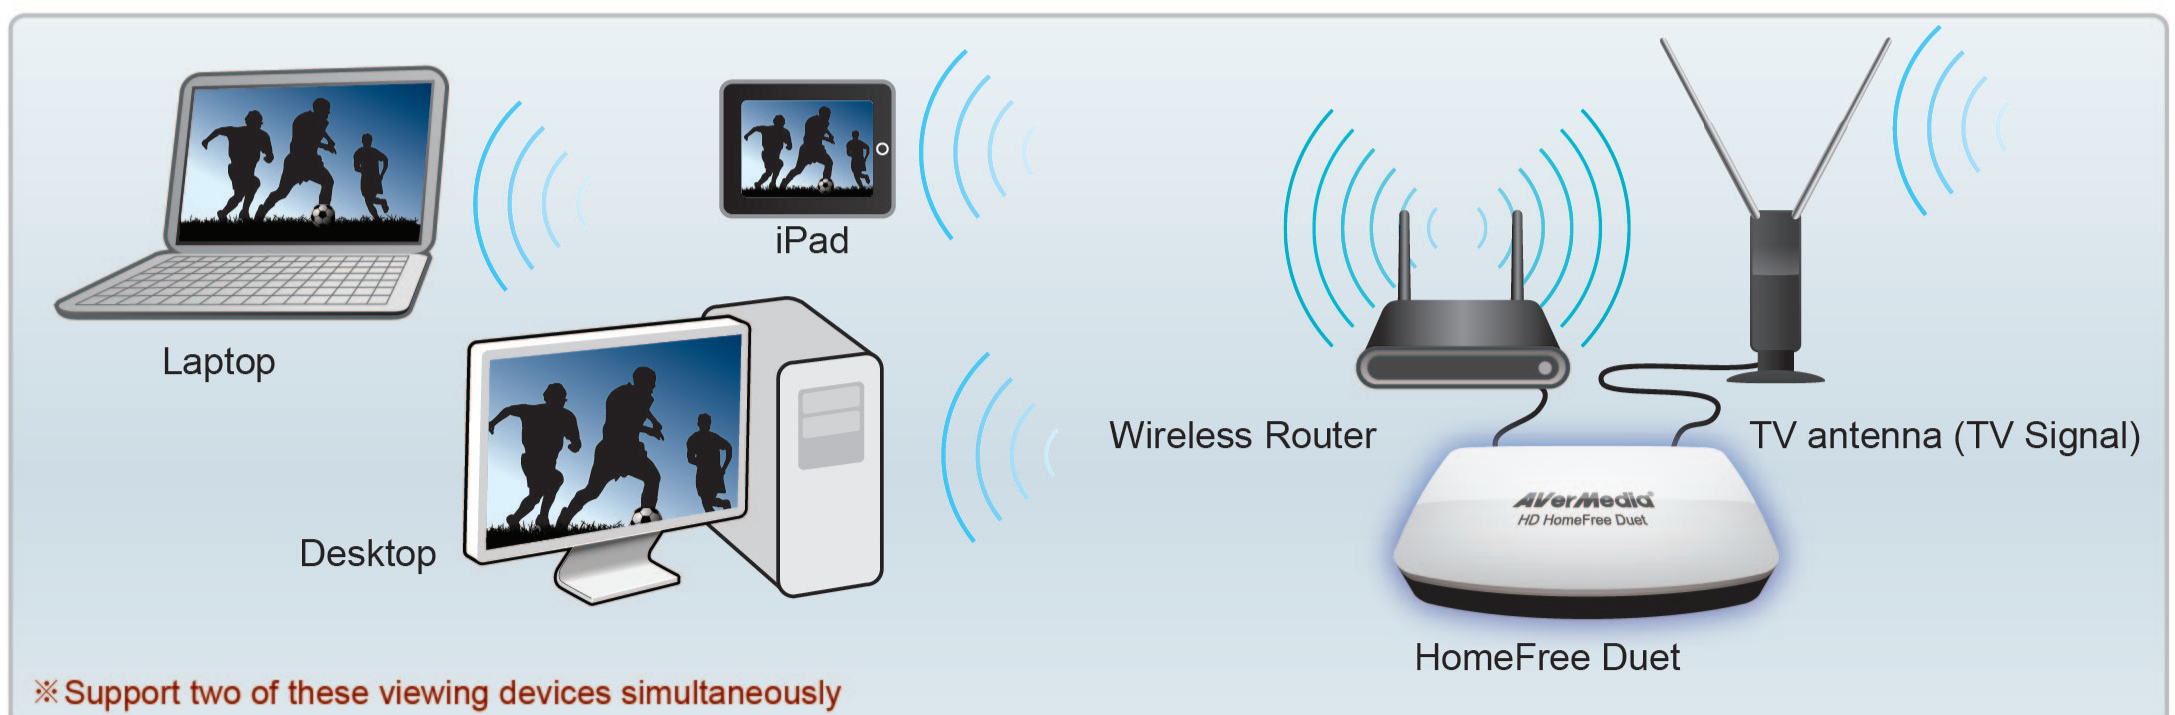

Compatible with Windows 7 Media Center and AVerTV 6 HomeFree software to watch TV on laptop/ desktop

- 1.Support computer users to watch digital TV with Windows 7 Media Center and AVerTV 6 HomeFree software
- 2.Broadcast zero-loss HDTV quality up to 1080p via a home network to laptops and desktops
- 3.Users can schedule a recording and time-shift TV programs on their laptop and desktop
- 4.Serve two users to watch or record different TV channels on their computers at the same time.

Highlights:

- 1.Stream digital TV to iPad/ laptop/ desktop via a (wireless) home network
- 2.Serve two users to watch digital TV simultaneously. No worries to miss favorite shows any more
- 3.HomeFree player designed with an intuitive interface is easy for iPad fans to use
- 4.Compatible with Windows 7 Media Center and AVerTV 6 HomeFree software to view TV on computers
- 5.HomeFree can broadcast full resolution video quality up to 1080p. iPad hardware specification only supports SD video quality.
- 6.As a network device, there is no need to be installed near users' viewing devices

LAN Environment Requirements (For streamed TV signal transmission)	HomeFree Player for iPad (Please download it from Apple App Store) • Wire LAN : High-Speed (10/100 Base-T) Ethernet • Wireless LAN : 802.11n with Multiple Input / Multiple Output* *MIMO=2x2 or above

- Notes:
- HDTV will only function when the TV signal is in HDTV format.
 - The operating fluency depends on computer specifications while viewing / recording TV programs.
 - Streaming quality and fluency depends on the stability of wireless LAN.
 - HomeFree Duet supports video quality up to 1080P; however, iPad only supports SD video quality.
 - iPad does not support recording function due to its technical specifications.
 - iPad users need to purchase HomeFree player on Apple App Store to use together with HomeFree Duet.
